

MEMORY GAME (UNIT 10 LESSON 1)

Memory Game (concentration game)

This is an example of the classic concentration memory game. It offers an opportunity to improve memory and consolidate each lesson's material in a playful way. Print all pages and laminate (or stick together) each card so that you have the magic book 2 cover on one side and the picture on the other. On each turn, a learner comes and turns over two cards (one at a time) and keeps them if they match. With each picture revealed the learner is asked to **reproduce** (as best as he/she can) the dialogue of the picture. If they successfully match a pair of pictures, learners get an extra try. Their goal is to find all pairs in a certain number of attempts (e.g. 4).
